

Joint statement

EU Commission decision concerning vital food and feed import The food and feed chain needs urgently legal certainty

Brussels, 14 July 2014

COCERAL, FEDIOL and FEFAC call on the European Commission to safeguard vital imports of soybeans, maize and various protein-rich products derived thereof from the key exporting regions to the EU. By unlocking urgently and by July 2014 the EU authorization of 8 GM products (1) for import, food and feed processing the college of Commissioners will provide the necessary legal certainty to food and feed business operators.

The EU depends for 75% of its needs for protein-rich ingredients for feeding purpose on the global world markets. Some of these GM products, maize, soy and rapeseed are already commercialized abroad, others will be harvested and made available in the key exporting regions to the EU as from autumn 2014. Further delays in the EU authorization process may, therefore, lead to significant shortage and trade disruptions due to unavoidable presence of these GM events in our supplies of both GM and non-GM material. This would trigger uncertainty on import flows, supply chain disruptions and price hikes for basic food products and major feed ingredients as well as undermine the competitiveness of the EU food, feed and livestock sectors, if a decision is not taken in July 2014.

The 8 GM products have been deemed safe by the European Food Safety Authority (ESFA) and have reached the final stage of the risk management process. The decisions for the related EU import authorizations lay in the hands of the EU Commission: some of them are awaited since the end of 2013.

COCERAL is the European association of cereals, rice, feedstuffs oilseeds, olive oil, oils and fats and agrosupply trade. It represents the interest of the European collectors, traders, importers, exporters and port silo storekeepers of the above mentioned agricultural products. COCERAL's full members are **30 national associations in 19 countries** [Austria, Belgium, Bulgaria, Cyprus, Denmark, Finland, France, Germany, Greece, Hungary, Italy, Luxemburg, Poland, Romania, Slovenia, Spain, Sweden, the Netherlands and the UK] and **1 European association** [Unistock] With about **2700 companies** as part of COCERAL national members, the sector trades agricultural raw materials destined to the supply of the food and feed chains, as well as for technical and energy uses. COCERAL has two associated members in Switzerland and Serbia.

FEDIOL, the EU vegetable oil and proteinmeal industry association, represents the interests of the European seed and bean crushers, meal producers, vegetable oils producers, refiners and bottlers. FEDIOL's members are **12 national associations** and associated company members in **5 other EU countries**. With about **150 facilities** in Europe the sector provides **20.000 direct employments**. Its members process approximately **36 million tonnes** of basic products a year, both of EU origin and imported from third country markets. The sector processes notably rapeseed, sunflower seed, soybeans and linseed into oils and meals for food, feed, technical and energy uses essentially on the European market.

FEFAC is the European Compound Feed Manufacturers' Federation. FEFAC represents **24 national Associations** in **23 EU Member States** as well as Associations in Switzerland, Turkey, Croatia, Serbia, Russia and Norway with observer/associate member status, and is the only independent spokesman of the European Compound Feed Industry at the level of the European Institutions. The European compound feed industry employs over **110,000 persons** on app. **4,000 production sites** often in rural areas, which offer few employment opportunities.
